

audiebant audio

Audiebant Audio is the foundation of mass communication system, delivering powerful, scalable audio for day to day communication and emergencies. The innovative approach blends intelligent software with compact, easy to-deploy hardware, creating a plug-and-play system that offers high-performance audio control with minimal infrastructure.

Whether you're integrating into an existing audio setup or building from the ground up, **Audiebant Audio** adapts to your environment. It can enhance existing PA systems with cloud intelligence or be deployed as part of a completely new zoned installation. This makes it ideal for phased upgrades, site-wide rollouts or facilities with no current PA infrastructure in place.

Audiebant Audio is designed for all sectors, with proven effectiveness across educational facilities, corporate offices, government buildings, entertainment and sports venues, places of worship, healthcare facilities and more.

Key Features

Text To Speech

Turn written or spoken text into clear, natural announcements instantly, ensuring critical messages are always heard and understood

Multilingual

With support for over 200 languages, our systems bridge communication barriers and deliver messages that resonate with every audience

Cloud-Based Management

Secure, browser-accessed portal to manage scheduling, announcements, and system diagnostics from anywhere

Zoned Audio Distribution

Target individual rooms, blocks, floors or outdoor spaces with precise, scalable zoning control

Emergency Override

Ensure emergency and critical alerts interrupt any scheduled programming instantly

Smart Scheduling & Pre-Programming

Automate bells, routine announcements, and scheduled broadcasts to streamline daily operations

No Server Required

All intelligence is embedded in the endpoints, reducing infrastructure and IT overhead

Superior Sound Clarity

Clear, calm and concise announcements, even in large or noisy environments

Seamless System Integration

Fully compatible with **Audiebant Control**, **Audiesafe**, **Audiescreen** and future **Audiebant** modules

How It Works

Audiebant Audio combines hardware and cloud services to enable full audio control from a secure online portal, or mobile app. Once installed, zones and message priorities are configured through **Audiebant Control**. Live or scheduled announcements can then be broadcast instantly or at specific times.

In an emergency, pre-configured alerts or live announcements can override all content, ensuring urgent messaging is delivered without delay.

System diagnostics and audit logs provide transparency and peace of mind.

Step-by-Step System Deployment

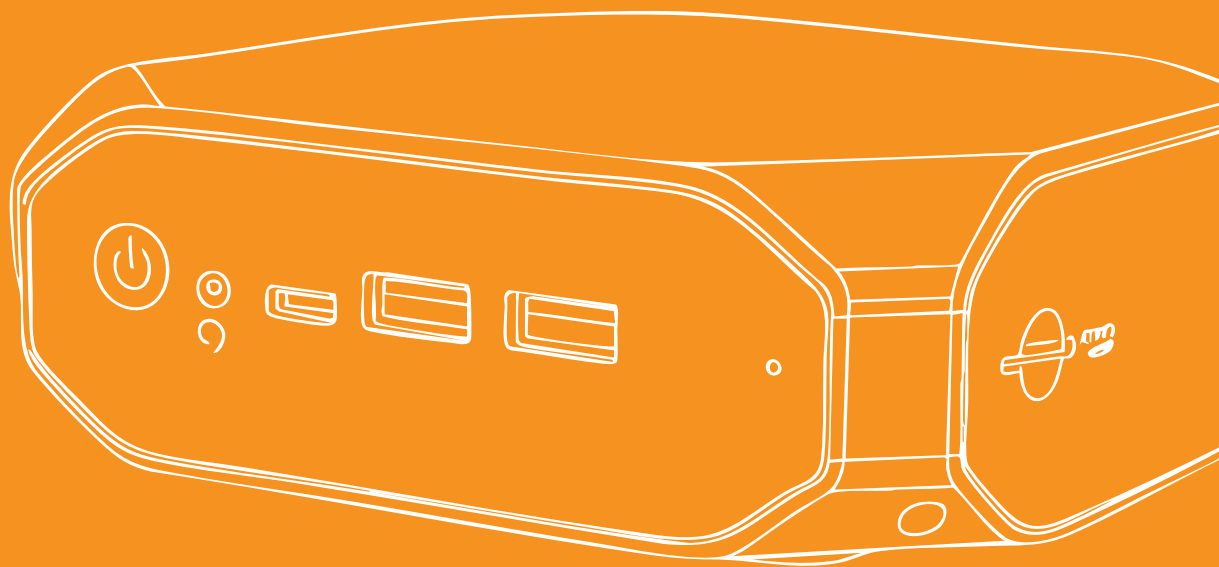

- Install **Audiebant** media players across your site (new or retrofit)
- Configure zones and messaging schedules in the cloud
- Schedule daily messages or deliver live broadcasts
- Trigger emergency overrides when needed
- Monitor system status and performance remotely

Why Audiebant?

At **Audiebant**, we believe communication should be seamless, intelligent and reliable. As a global technology company, we specialise in unifying audio, visual and mobile alerts into one powerful system ensuring people stay safe, informed and connected.

Our scalable, user-friendly solutions are trusted by organisations across education, healthcare, government, transport, events and commercial sectors, delivering the right message, in the right place, at the right time.
