Zero bonded glass

Full Array Local Dimming (FALD)

Helping schools use technology to deliver better education

ActivPanel 10

Simplicity

Simply plug and play to bring interactivity to your lesson content - all hosted from your device, or through one of the OPS units available. With upto 40 points of touch, students can interact directly on your device.

Adaptability

Screen-Share with multiple devices through ActivSuite, allowing class collaboration between and on student devices direct to the board, helping with class feedback and team work.

Connectivity

With a wide variety of ports, the ActivPanel 10 is compatible with most devices. With power delivery via USB-C, one cable can do power, audio, visual and touch.

Security

With no OS on the panel, there is no reliance on updating your device to maintain it's working ability. This increases activity time and maximises student learning.

Longevity

With no built-in operating system that requires updating, ActivPanel 10 is designed to last alongside your current and future devices.

"Easy to use, we simply plug in our laptops and we are ready to go. We often teach in multiple rooms, so this saves us a large amount of time"
