

SMART Board MX Series

The Game Changer

SMART®

V4

#1 Touch Technology

The game has changed with the MX Series, a display that offers value and capability that competitors just can't touch

Built to last

Packed with future-facing technology specifications to support the greatest ease of use, longevity, and the widest variety of implementation needs.

Key Features

- Built-in Android 11
- Up to 20 NFC sign-in profiles helping secure your data with screen lock, and moving between panels.
- Cloud storage access
- 40+ students connected to display
- Split Screen mode
- 10 student connection options
- 2 way annotation
- Microphone array with integrated webcam and speakers.

Get Connected

Easily connect and interact with your devices and content so they do more to support active learning – in and out of the classroom.

Screen Sizes

55" | 65" | 75" | 86"

Helping schools use technology to deliver better education

Multi-user touch

Featuring up to 20 points of touch, the panel intuitively recognises pen and finger touch automatically, so users can write, erase, touch and gesture at the same time.

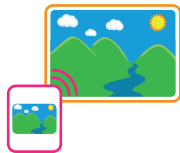

Plug & Go

Connect multiple devices, such as desktops, laptops, visualisers, and easily switch between them all on demand. With USB-C, use one cable to give touch, view, and even charging the device plugged in.

SMARTMirror Screen Share

Connect your entire class to your board without individual logins, plus with added touchback support, students can interact with the board from their device.

For the Future

SMART displays with iQ provide free automatic Over-the-Air updates, providing a hassle free way to upgrade your display(s) without a manual process. Upgradable computing modules increasing lifespan too.

Walk up & teach

Built in content and activities make it easy for teachers to add interactivity and engagement on the fly, even if they have never used a SMART panel before, so teachers can just walk in and start teaching.

iQ & Android 11

iQ utilises Android 11, and is more powerful than ever, with fewer clicks saving teacher time, while offering full connectivity to online drive files, when you need them.

MX Series

“The SMART MX panel is quick, and easy to use, making lessons easier to engage with students. Plus features like the NFC reader make the board secure when away from the board, but available instantly when needed”
