

SMART Board RX Series

Explore what's possible

SMART®

V1

Built to evolve around your needs with ease of use, the RX series is the only interactive display that offers user-programmable tools to help you support inclusive classrooms.

Blend physical and digital worlds

Turn static lessons into immersive learning experiences with SMART's Tool Explorer technology for a participatory learning journey like no other. Let your students write, erase, touch, and gesture at the same time without interfering with one another's tool choices for a truly collaborative experience – only with SMART.

Android 13 made SMART

Easier workflows for educators, a feature-rich whiteboard, built-in tools and resources, and student device integration – all designed to save you time and offer a personalised user experience.

iQ puts everything teachers need to confidently teach at their fingertips, regardless of their tech comfort level.

Screen Sizes

65" | 75" | 86"

Security meets convenience

With NFC and QR-based sign-in options, say hello to a secure, convenient login and enjoy a personalised user experience with direct access to your cloud storage.

Multi-user touch

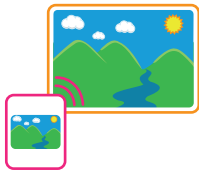

Featuring up to 40 points of touch, and Object Awareness to detect pens and touch automatically, intuitively write, erase, touch and gesture at the same time, assisted by SMART Ink, and multi-colour styluses.

For the Future

Google EDLA certification allows full integration and access to a large suite of Google services. Enterprise level security allows for a single-sign on experience using a NFC reader. Plus full access to the Google Play Store and Google apps

SMARTMirror Screen Share

Connect your entire class to your board without individual logins, plus with added touchback support, students can interact with the board from their device.

Plug & Teach

Connect multi devices, such as desktops, laptops, visualisers and easily switch between them all on demand. With USB-C (15W/65W) also available, use one cable to give touch, view, and even charging the plugged in device.

Remote Lessons

With strong camera and fully integrated microphone array, you're able to move around the classroom, and maintain your link to students remote from the classroom, maintaining full engagement through all major video conferencing providers.

iQ & Android 13

Utilising Android 13, iQ is an all-in-one experience giving one-touch access to SMART education and third-party applications without connecting an external computer, including the powerful whiteboard, web browser and more.

RX Series

“With our RX going in our classrooms, pupil engagement has increased along staff confidence in technology, due to the versatile and reliable performance of the panels. They have been a revelation.”
